

Science - Grade 4

The Human Body - Sense Organs

We have five sense organs:

1. Eyes - for seeing
2. Ears - for hearing
3. Nose - for smelling
4. Tongue - for tasting
5. Skin - for feeling

Each sense organ helps us understand our environment.

Activity: Close your eyes and touch a spoon. What do you feel?

Plants and Their Importance

Plants are living things that grow in soil and need sunlight and water to grow.

Importance of plants:

- They give us food.
- They provide oxygen.
- They give us medicine.
- They prevent soil erosion.
